Stenneth Swaby

Edgewater Park, NJ 08010 | LinkedIn| Github | stenneth.w.swaby@gmail.com | 301-222-7037

U.S. Navy veteran and M.S. Engineering Management student. Proven ability to build relationships, manage competing priorities, and operate effectively in high-pressure, cross-functional environments. Seeking to apply technical expertise, communication, and leadership experience in a Customer Success Manager role.

Education

University of Massachusetts Lowell — **Lowell**, **MA**
Master of Science in Engineering Management — Sep 2026 - Present

The College of New Jersey (TCNJ) — **Ewing, NJ**
Bachelor of Science in Computer Science — Aug 2022 - Dec 2025

Professional Experience

The College of New Jersey — **Ewing, NJ**
Undergraduate Research Assistant (Robotics) — Sep 2024 - Dec 2025
Linux (Ubuntu) | ROS | Python | C++ | TurtleBot 3 | GitHub

- Collaborated with faculty and research team members to troubleshoot robotics hardware, software, networking, and sensor-integration challenges.
- Reimplemented TurtleBot3 teleoperation functionality using socket-based communication, enabling remote robot control and supporting analysis of ROS messaging architecture.
- Documented configurations, experiments, technical issues, and research findings to improve reproducibility and knowledge sharing.
- Communicated technical findings and project progress to faculty and peers while contributing to long-term robotics research objectives.
- Presented research findings at TCNJ's Celebration of Student Achievement to the School of Science.

U.S. Navy — **United States, Africa and South Asia**
Hospital Corpsman Second Class (Fleet Marine Force) — Sep 2016 - Apr 2025
TCCC | Logistics | Leadership

- Served in customer-facing and leadership roles supporting hundreds of service members across clinical, operational, and deployed environments.
- Supported patients and multidisciplinary clinical teams in Walter Reed's Emergency Department.
- Supervised 4 as the Leading Petty Officer (LPO) of the Medical station supporting 3rd Bn, 14th Marines; cared for over 300 Marines and ensured they were medically ready to deploy.
- Field medical technician and Fleet Marine Force warfare specialist with multiple deployments, including a Marine Expeditionary Unit (MEU) deployment as part of the Global War on Terrorism.

Skills

Customer Success | Relationship Management | Technical Troubleshooting | Customer Training | Cross-Functional Collaboration | Project Coordination | Stakeholder Communication | Leadership

Professional Tools: Technical Documentation, Jira, Slack
Programming: Python, Java, C++, Ruby, SQL, HTML, CSS
Technologies: Linux/Ubuntu, ROS/ROS2, Ruby on Rails, PostgreSQL, OpenCV, GitHub, TurtleBot3

Interests

Aviation | Robotics | Open Source Software | Golf | SCUBA Diving | Volunteering
